

SK-EH204

ANESTHESIA MACHINE

SK-EH204

FEATURES AND HIGHLIGHTS

The characteristics of

- MJ-560Be3 Anesthesia Machine, with its ergonomic design, integrates a concise and smooth structure and high mobility. The microcomputer controlled Ventilator adopts exported sensors and other components. Its scientific and proper design as well as rigorous production process are what demonstrate the inner quality of Aokai products: mechanical ventilation is made secure and visible by the folded respiratory bellows, and the security of ail supply is guaranteed by pneumatic transmission and measurement system. With multiple modern technologies applied, the Anesthesia Machine is both outstanding in performance and versatile in functions

Part of Ventilator

- The Ventilator adopts microcomputer control with high-definition colored LCD display integrating the functions of respiratory control and displaying the monitoring parameters. It is versatile in function and excellent in performance:
- The high-precision Vaporizer is designed with a stable concentration output, automatic compensation for pressure, temperature and flow rate.
- High-definition four-tube flowmeter, designed with stoppers for oxygen and nitrous oxide to control the output oxygen concentration
- Reliable pneumatic transmission system; Economic and proper configuration of technologies optional as required by the Customer;
- Modularized design and upgrading. Upgrading is available as required by the Customer.

Liquid crystal display (LCD)

High-definition LCD screen display

Integrated design

Perfect design of respiratory circuit with respiratory bellows

Flow control system

High precision flow control system meets versatile applications, especially for low-flow anesthesia. Backlight of flowmeter: provide help when operating room is dark

Compensation function

It has the function of automatic compensation based on pressure, temperature, and flow rate. The regulation range of evaporator concentration is 0~5% (0.1%~1%). Among Halothane, Enflurane, Isoflurane and Sevoflurane, two can be chosen for application as required by the customer.
