Large participation in Arab Health 2020

For the tenth consecutive year, Saikang Medical has actively participated in the Arab Health international fair, held between 27 and 30 January at the World Trade Centre in Dubai (United Arab Emirates). In this 45th edition, the evaluation by our sales team has been very positive.

Our medical equipment and furniture booth received more than 400 visitors, significantly increasing the participation of our already known customers and new customers compared to last year. With the help of our colleagues, all of them were able to know in detail some of our latest products; features and operation. In addition, attendees could pick up our new product catalogue and received a welcome gift.

Benchmark fair in the Middle East

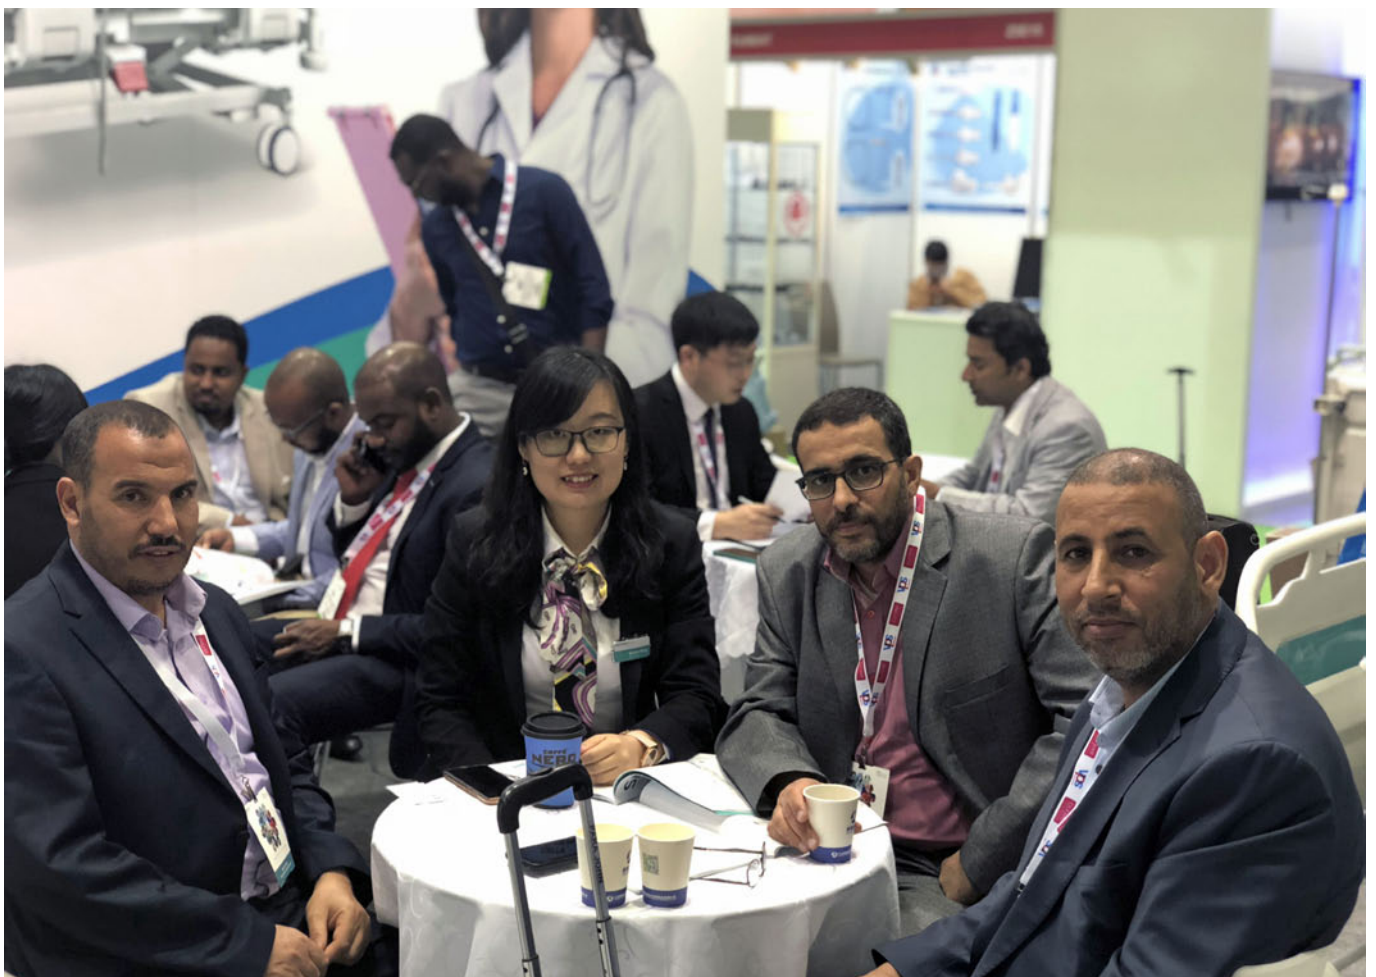

Today, Arab Health is an international reference event in the area of health. It is the most important fair in the Middle East and the second in the world, gathering the most important professionals and companies in the sector in a framework

of exhibition and congress. There we can find the latest technological advances in products, equipment and medical services, among which have also been those presented by Saikang Medical.

According to the organizers' data, this year's edition has received more than 100,000 visits and has gathered more than 4,200 exhibiting companies from 64 countries; 17 conferences on health issues have also been given. Everyone who wants to attend this fair can visit its official website (www.arabhealthonline.com); we will meet you there again in 2021 and we will be happy to assist you.

Next, some of the photos taken during the fair. More images available in the "Arab Health 2020" album of our Facebook profile.

Work and solidarity against Covid-19

As we know, the Covid-19 virus has been active since the beginning of the year, affecting mainly the population of the Chinese city of Wuhan and its Hubei province. For this reason, and with the intention of providing our little help, Saikang Medical donated 200 sets of hospital beds, bedside tables and screens to this province.

In addition, we want to thank the support received from our customers, who always prove to be our friends. Among them, we highlight the great help of Mr. B.P. George, from Dubai, who donated a lot of 8,000 masks (in the second image) to the Xuzhou Hospital in Jiangsu.

The situation is improving

Since the month of February, the medical and productive situation in our province Jiangsu, and throughout China in general, is improving. Since the beginning of the epidemic, as of today, a total of 80,175 people have been affected by the outbreak in China (so far with 44,559 people already recovered and 2,915 dead), among these 631 people in Jiangsu (with 538 recovered and 0 deceased).

As in many companies in our country, in Saikang Medical the delivery times of some of our orders have been affected, as there have been difficulties for the production and supply by some of our suppliers of raw materials and components to work normally. We appreciate the understanding of our customers.

Although it is difficult to make estimates, experts say the situation could stabilize in April.

News from Cedarcare Hospital

Equipment improvements are already in use

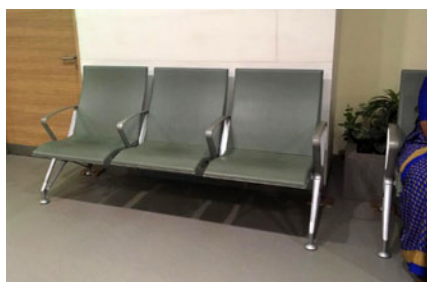

We receive images and good news from a great client, such as the Cedarcare Hospital in Lekki, in the state of Lagos (Nigeria). Last October we placed an order for more than 50 types of products, such as electric operating beds, exam tables, cribs, ABS bedside tables, nursing carts, medical curtains, etc. Everything is already in use and the assessment that we are transferred is very positive.

Cedarcare is a modern four-story hospital, recently built, well equipped to provide good patient care. Among its facilities it has an operating room, delivery room, research room and laboratory.

For our part, we are very satisfied with the work done and proud to contribute to improving the hospital facilities. In addition, there is nothing more rewarding than meeting the expectations of our customers. We work for the continuous improvement of quality, both in our products and in service and attention. And our goal is the user, both health professionals and patients.

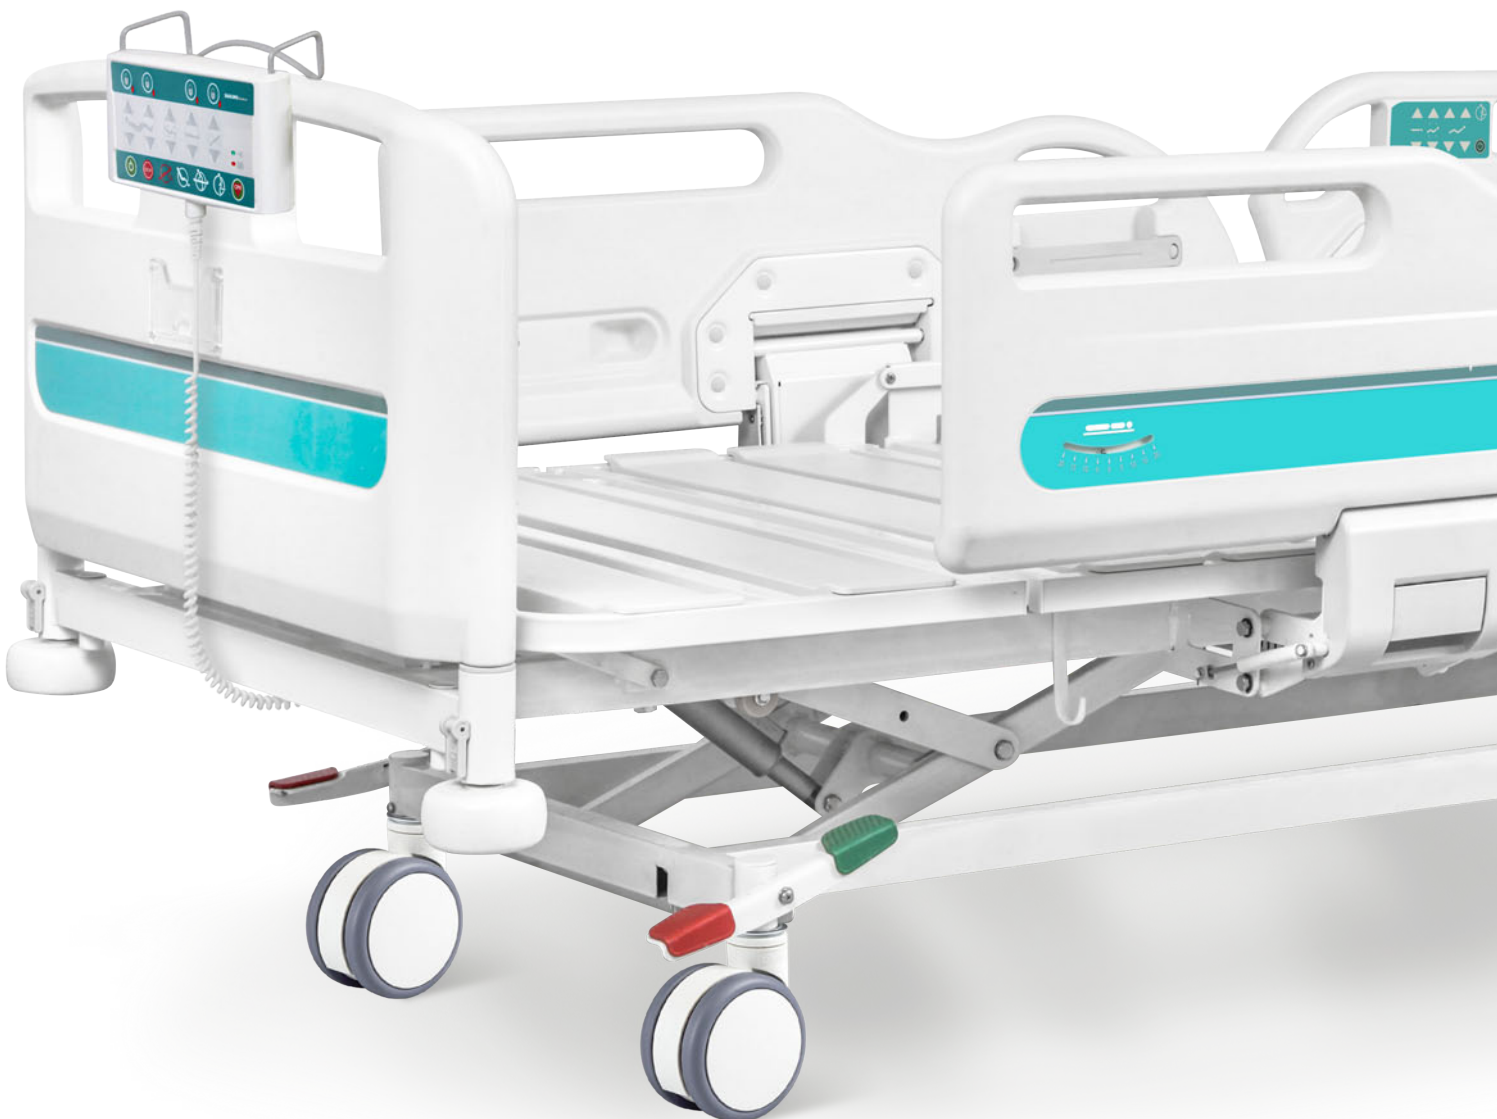

Alongside these lines, images of the hospital facilities and part of the professional team.

Y8Y8C

Some improvements in our multifunction electric bed

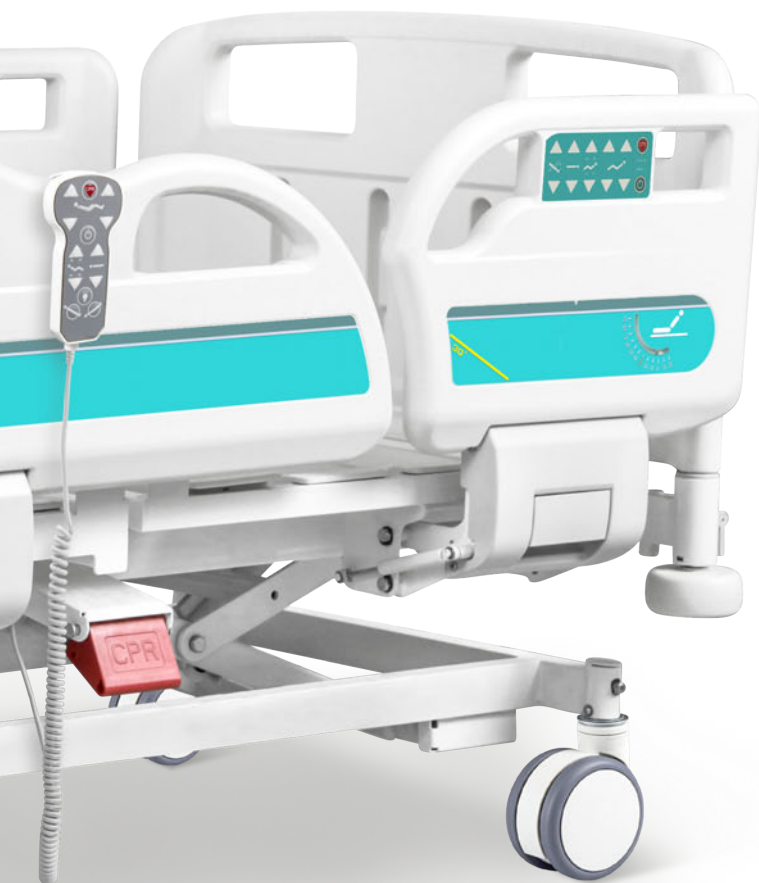

The new Y8y8c electric bed model, belonging to the Oasis series, was presented at the Arab Health exhibition in Dubai last January.

The new features and improvements of the bed got very good acceptance among the visitors, who were able to check their numerous functions on the spot. This interest has already materialized in several orders from countries of the European Union and Saudi Arabia.

Technical parameters

- Bed extension (20 cm)
- Back up battery
- Nurse control panel
- Emergency stop button
- Cardiac chair position
- Directional wheels function
- 5th and 6th extra side rail for full protection
- Monkey pole
- Balkan frame
- Linen holder

In brief

Our next date: Egypt in April

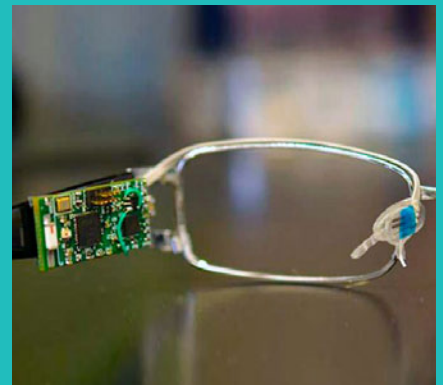

Saikang Medical will return to North Africa Health, which will take place from April 7 to 9 at the Egypt International Exhibition Center in Cairo. This will be our third time to participate in the exhibition, and we will do it at stand number H2.J30, where we will show, above all, our modern beds and their components, which we also supply separately.

During those days, the fair will be the epicenter of medical commerce in North Africa, with more than 180 exhibiting companies and more than 40 countries represented. For more information about the fair, we can visit its official website (www.northafricahealthexpo.com).

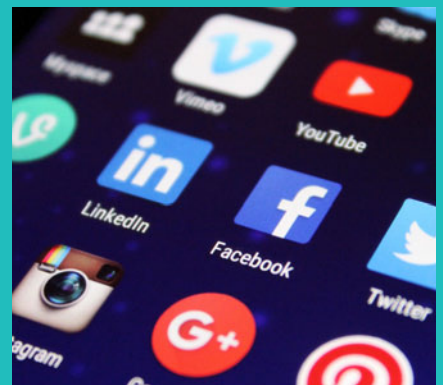

Biosensitive eyeglasses to control diabetes

Scientists at the University of Sao Paulo and the University of California have jointly developed glasses that have the ability to measure blood glucose, vitamins and alcohol levels. How do they work? People should produce tears by exposing their eyes to a substance, which stimulates the tear gland. The tears come into contact with an enzyme (glucose oxidase), alter the flow of electrons and generate a signal that is recorded and processed in the glasses. The result is sent in real time to a smartphone and a computer, so the new system will offer diabetic patients a more comfortable and less invasive formula to control their disease.

Saikang Medical on social media

Recently we have joined Instagram (@SaikangMedical), so we are already present in the most used social media. Both LinkedIn (SaikangMedicalEquipment), Facebook (@SaikangMedicalEquipment) and Twitter (@SaikangMedical) share information about us and the health and medical sector, and we will do so also on Instagram, but in a lighter way. On the other hand, on YouTube (Saikang Medical) we can find especially videos of our products, a good way to complete the information about its characteristics and its use. If you follow us we can have a closer feedback relationship to improve our attention to you.
