2022 MEDICA
Welcome Back!

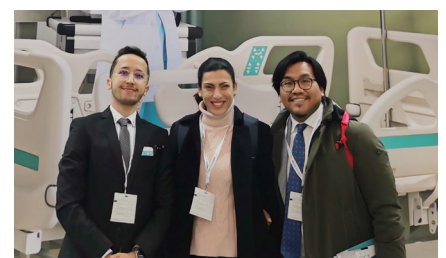

CMEF Shenzhen	3
Zambian Clients Visit	4
Developed ICU Beds	6

Be with Our Friends at **2022 MEDICA**

This is a precious and extraordinary exhibition for us. It has been 10 years since we first participated in MEDICA. Due to the epidemic, we have not participated in this

important exhibition for 3 years. In November of 2022, we were reunited in Germany. We took some photos at the booth to remember those wonderful moments. Thank

you for your company over the years and hope we have more to look forward to.

Our Online Activity at the CMEF Shenzhen

We participate in CMEF continuously every year. In the face of the challenges of the epidemic, there is no end to provide satisfactory service. This is a meaningful event for international medical

professionals to find their own needs through our live broadcast at the CMEF. This online event was carefully planned by us. The customer's needs are inquired and noted. At the CMEF, we exhibited

their interesting products on the live screen. Both of online and offline presentations were enabled by us.

The First Factory Visit over the Past Three Years

Zambian Clients Visit SAIKANG for a Major Hospital Project.

Over the past three years, how have you been?
Thanks for your continuous appreciation of our solutions from the long distance.

To our excitement, we received the first invitation to visit the factory. It has been three years since the last factory visit. We take this very seriously. On 14 December 2022, we welcomed the representative of the Minister of Health of Zambia. They came to China to promote a major hospital project in Zambia. We showed great sincerity, introduced the company and products in detail, and arranged rich welcome activities.

Thanks for **your trust!**

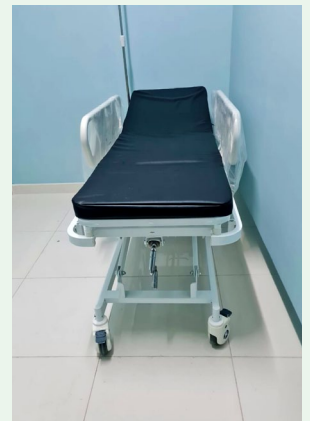

Pakistan

CMH Sargodha primarily focuses on providing specialized medical services and treatment to military persons, their families and even the civilian population. It is equipped with advanced medical facilities and specialized medical staff from all over Pakistan to provide best treatments to the patients without compromising the quality.

Mozambique

Dr. Isaque Mavila clinic is a new private clinic in Mozambique. We provide Dr. Isaque Mavila clinic with a variety of medical furniture to equip their clinic. Now, the furniture matches the clinic well.

Innovations in Our Independently Developed ICU Beds.

Why are any patients admitted to the ICU after surgery?

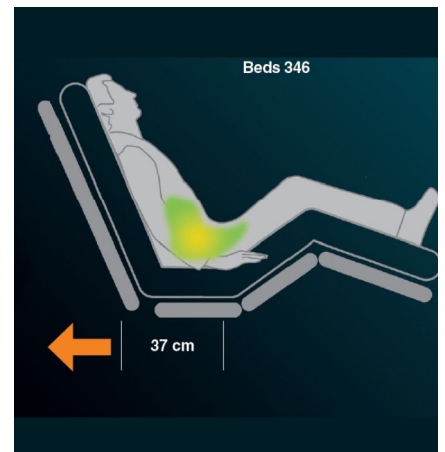

When a patient undergoes major surgery, some damages are done to his body and organs. The intensive care unit will then continue the complex treatment ordered by the surgeon. Intensive care will aid the patient's recovery.

What is the difference between ICU ward and general ward?

ICU ward is well equipped with monitoring equipment, ventilator equipment, ECMO and other equipment. These devices can help caregivers keep track of a patient's condition and give more accurate care.

What functions should the ICU bed have? Auto-Regression 10+6 cm

When repositioning the backrest and thigh rest, the Y8Y8C makes the back plate retreat 10cm and the thigh plate retreats 6cm so to minimize the pressure and shear forces in the patient's pelvic region. This results in a significant reduction in the development of pressure ulcers.

Manual CPR

CPR emergency reset handle to immediately flatten the bed back part; located on both sides of the bed.

Electric CPR

Electric CPR button is settled inside control panel and nurse control panel, one button to make the back plate flat.

One button cardiac chair

The position of the cardiac chair can be easily adjusted by using a single button to maximize the respiratory function and cardiac output.

One button nursing position

One button nursing operating position: 800mm, helping the nurse to give fast treatment in a very comfortable height.

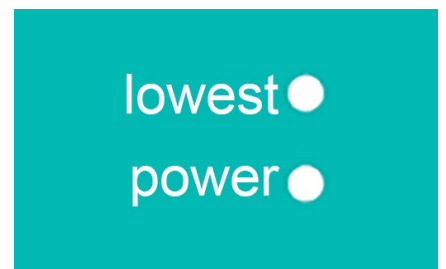

One button trendelenburg position

One button trendelenburg position, helping the quickest rescue performance.

Lowest position indicator

The lowest position indicator design allows the medical staff to observe the bed safe position during night or long distance; green light indicate lowest bed height.

In brief

Our International Trips in 2023

The New Year, more challenges, more opportunities, more expectations. Offline international exhibitions will be held as scheduled, such as ARAB HEALTH, Hospitalar Brazil, FIME USA, TIHE Uzbekistan and Medical Fair Thailand. In addition, our team members will take long international trips to visit our customers.

Badminton Activity for Closer Friendship

Badminton events are held irregularly. Our company has held three badminton events. The members took an active part and friendship was enhanced. Good qualities like positive attitude and strong determination were cultivated in the process.

Good News: Our Factory Visit is Available

On the 6th of December, the novel corona virus is classified as a category 2 infectious disease in our country. We can participate in international exhibitions and receive factory visits if we protect ourselves well. Hope we can have a face to face communication about our medical business.
