Global Health

Saikang Medical participated in the Global Health Exhibition from October 21 to 23 in Riyadh, Saudi Arabia. This event is one of the largest medical industry exhibitions in the Middle East and served as a platform for Saikang Medical to enhance its market presence and showcase new medical technologies.

During the exhibition, the booth was busy, with our team engaging visitors and demonstrating products, leading to significant interest and potential partnerships. The exhibition allowed Saikang Medical to strengthen our brand recognition and establish connections with industry professionals in the region. In the future, Saikang Medical will continue to launch high-quality medical products to meet market needs.

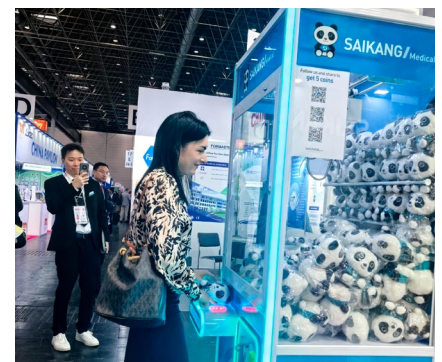

Saikang's Successful Journey at MEDICA 2024

In November, Saikang made a significant impact at the MEDICA 2024 exhibition in Germany. At MEDICA, Saikang displayed a number of innovative medical devices, including smart beds and advanced operating tables. These products reflect our commitment to enhancing patient care and improving medical service efficiency.

To add a fun element, we set up a claw machine, where attendees could win unique Saikang panda souvenirs, fostering memorable connections. Our team actively interacted with participants, building trust and understanding of our brand. The positive feedback from international customers highlighted their eagerness to collaborate more closely with us.

We want to extend our heartfelt thanks to every visitor, partner, and friend who supports our growth. We firmly believe that Saikang will continue to strengthen our relationship with global partners to jointly promote medical technology's progress and development.

Customer Visiting

In the past few months, Saikang Medical has been fortunate to welcome distinguished customers from all over the world. These professionals from different cultural backgrounds not only bring unique perspectives and needs from their regions, but also provide us with a valuable communication platform, allowing us to have a deeper understanding of the needs and development trends of the international medical market.

During the visit, our distinguished guests visited Saikang Medical Global Medical Care Experience Center and experienced our latest innovative technologies and comprehensive solutions firsthand. Every visitor expressed high recognition and appreciation for the technical strength and service quality we demonstrated.

Saikang Medical sincerely thanks every customer for coming. We look forward to working hand in hand with more global partners in the future to explore new frontiers of medical technology and strive to provide better medical services to people all over the world.

Thanks for **your trust!**

Saikang Medical partnered with a leading Tanzanian hospital to upgrade its medical furniture, improving patient comfort and caregiver efficiency. The hospital received electric beds, delivery beds, cribs, and other medical products, all tailored for optimal durability and functionality.

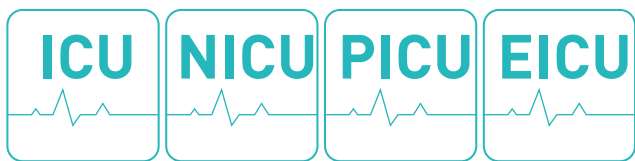

Hospital project

Saikang Medical provided new hospital beds to a local private hospital in Nepal. The goods have been successfully delivered and are currently in use. The hospital is highly satisfied with the quality of the products, establishing a strong foundation for further development in the Nepalese market.

Hospital project

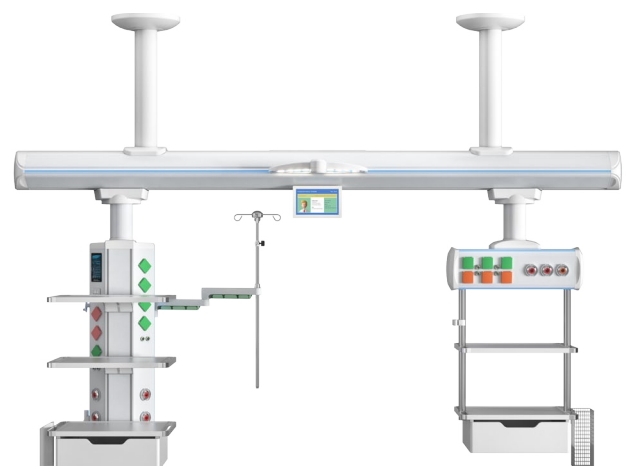

Alno X71

MEDICAL BRIDGE CEILING PENDANT

Integrated ICU lighting solution with head lighting, body lighting, and reading lighting. The brightness of top lighting, floor lighting, and contour lighting is adjustable, allowing for flexible combinations to meet different scenarios, facilitating nighttime observation and operations for medical staff. One-touch operation through a touch control panel enables smart and convenient management and control.

A307

Electric Hydraulic Operating Table

This electric hydraulic operating table is suitable for thoracic and abdominal surgery, brain surgery, ENT surgery, obstetrics and gynecology, urology, orthopedics and other surgical operations.

The material is 304 stainless steel, and the platform is made of high-strength synthetic plate which is translucent for X-ray. It can also shift the table back and forth up to 300mm for C-arm examination of all parts of the patient's body during the operation without moving the patient.

V7v

Electric Bed

Integrated PP bed platform, adopting advanced manufacturing technology. Enlarge the seating area when the back part is raised, providing more comfort for the patients. The built-in controller is located in the head guardrail, allowing the patient to adjust the basic position of the bed easily.

X36-1

Electric Examination Table

The bed surface with two folds of three sections ergonomic design, can realize elevation adjustment according to the patient's height, achieving personalized design to help diagnosis. Bed and chair dual-use, high load-bearing, durable and stable, fearless of heavy pressure impact, to ensure the safety of use.

In brief

Saikang Medical 2024 Supplier Conference

On the afternoon of October 27, Saikang Medical successfully held the 2024 Supplier Conference and supplier representatives from all over the country gathered together.

Saikang Medical warmly welcomed every friend who came from afar and expressed sincere gratitude for everyone's arrival. Saikang Medical will work hand in hand with all partners to create a better tomorrow for the medical industry!

Merry Christmas

As we celebrate this joyous season, we hope that this Christmas brings you and your loved ones abundant joy, warmth, and cherished moments. May you find peace and happiness during this special time of year. Wish you a Merry Christmas and a prosperous New Year!
